

CABEXT!

FIRE ALL-OUT IN SECONDS

SERVER & ELECTRICAL CABINET

FIRE PROTECTION SYSTEM

ALLTEC'S SIMPLE,
EFFECTIVE & ENVIRONMENTAL
FIRE EXTINGUISHING SYSTEMS
FOR SERVER & ELECTRICAL CABINETS

- Does not harm equipment or leave damaging residue
- Non-Toxic and Environmentally friendly
- Eco-friendly: does not deplete oxygen or ozone layer
- Maintenance free (battery replacement once per year)
- Non-pressurised

CABEXT!

FIRE-ALL-OUT IN SECONDS

ALLTEC'S CABEXT! THE ONE AND ONLY COMPLETE, EASY-TO-INSTALL FIRE PROTECTION FOR SERVER & ELECTRICAL CABINETS!

ALLTEC have been the leading pioneers of Aerosol Fire Extinguishing Technology, invented at the peak of the Space program for their fire protection.

CABEXT! The heat-sensitive Thermocable detects and in turn automatically activates the system at 68°C or 88°C or 105°C, depending on the environment.

Upon activation CABEXT! quickly transforms an inert, solid compound into a rapidly expanding cloud of harmless, micro-solid particles of potassium salts. These particles reach instantly with the "free radicals" in the air that cause the combustion chain to break and swiftly extinguishes the fire!

Also, an additional benefit, is that the micro-particles also absorb the fire's heat. When the fire is out, they remain as a fine dust, protecting against re-ignition until softly brushed away. They do not harm people or the environment and do not damage equipment which can continue to work even after CABEXT! is activated and the fire extinguished.

SERVER & ELECTRICAL CABINET FIRE PROTECTION SYSTEM

CABEXT!

FIRE ALL-OUT IN SECONDS

SERVER & ELECTRICAL CABINET

FIRE PROTECTION SYSTEM

ADVANCED FIRE PROTECTION IN 3 EASY STEPS: CABEXT!

1. CABEXT! screw brackets in cabinet.
2. Fit CABEXT! in brackets and connect the Thermo-cable.
3. Attach the Thermo-cable to the inside of the cabinet and then close the cabinet, system ready!

APPLICATIONS

Computer server cabinets, wind turbines, Power factors units, ATM machines, electrical switch gear cabinets, diesel generators, MRI medical scanner cable ducts, remote telcon cabinets and many other low and high voltage cabinet protection.

USE:

- It is an autonomous automatic fire extinguishing device with high concentration and flexibility.
- It also has the characteristics of being eco-friendly and non-toxic.
- It is used to extinguish fires of flammable solids, flammable liquids and electrical and electronic equipment up to 20 kV.
- CABEXT! is a practical with a fast reaction system
- 5 years warranty
- Do not use after expiry date. Up to 20 years life

TECHNICAL DATA:

- Models: CABEXT45 and CABEXT90
- **Dimension:** 40 x 415mm
- Activation by means of thermo sensing cable at 68°C or 88°C or 105°C
- Power by means of lithium battery size AA-1.5V
- **Weight:** 415gr. & 460 gr.
- Duration time >30sec and approx. 30 and 45 sec
- Extinguishing charge 45 and 90gr

WARNING:

- The working device produces high temperatures during and after release of aerosol
- Do not touch the metal tube during and after use
- Do not point the jet of aerosol towards people
- In case of accidental activation wait for the complete jet release of aerosol into the environment
- Do not use the device if it is damaged
- Do not disassemble the device
- Keep this device out of the reach of children

DISPOSAL:

- Disposal of the product and packaging must be carried out in accordance with national regulations.
- Kindly contact your local supplier / agent

CLASSIFICATION AND CERTIFICATION CE:

MANUFACTURED, TESTED, CERTIFIED & PATENTED IN the European Union to the highest EU Directives
